MAREW'S STORMWATER ADVENTURE- STORY WALK ANSWER KEY

Item 1	If the small ponds that the little girl builds cannot hold all of the rainwater, it will flow into Antietam Creek.
Item 2	A creek is a type of tributary that drains into a river. A watershed is an area of land that is drained by tributaries and rivers.
Item 3	Antietam Creek is a <i>tributary</i> of the Chesapeake Bay.
Item 4	If the water was carrying Marew into Antietam Creek, the land in the area would be part of the Antietam Creek <i>watershed</i> .
Item 5	<i>Pollution</i> describes harmful matter in stormwater.
Item 6	Trash and chemicals are kinds of pollutants that would be harmful to ducks and fish.
Item 7	Answers will vary. Items named might be: water bottles, toys, flip flops, soda cans, etc.
Item 8	<i>Stormwater</i> is flooding due to heavy rainfall.
Item 9	The water coming through the drains slowed because the rain slowed.
Item 10	People can minimize pollution in stormwater by picking up trash, filling in holes, and planting grass.
